

bamboo®

We've taken our responsibility for sustainable design and production one step further. Crafted from recycled ocean plastic, recycled PET Felt, and pressed bamboo our Bamboo range has been designed with our planet in mind. Available in straight and curved shelving options means style meets sustainability. Our curved shelving option is a response to the emerging popularity of a more organic and fluid style of landscape within the workplace and can be used to create spaces alongside curved curtain walls and soft lounge-style seating. Create your own design using our online Bamboo configuration tool.

FEATURES

Bamboo is a carbon negative material and the use of bamboo products can help achieve a higher certification level for LEED and BREEAM

Configurable for any workspace

Easy and quick to assemble, supplied with tools for quick install

100% recycled ocean plastic connectors

Framework available in any of our RAL colours

All shelves, cupboards & lockers made from side-pressed bamboo

Incorporate biophilia with integrated and mobile planters

Felt panel for pinboard use, made from a blend of 70% recycled and 30% virgin PET

Packaging is made from 100% recyclable cardboard, made from 80% recycled material

Mobile table for agile working

Lamp to fit any configuration

Treated with a clear lacquer for protection and increase longevity of surfaces

bamboo | environmentally conscious

Our Bamboo range has been created by our environmentally conscious in-house design team, where possible we have opted to use the most eco-friendly and low impact materials. This year, we've taken further steps towards a more sustainable future. It starts with the launch of our Bamboo collection, a range that uses environmentally conscious materials and processes. All our shelves, cupboards, storage boxes and tabletops in the range are made from bamboo. This material is widely known for being extremely sustainable hard wood alternative - it has a negative carbon footprint!

bamboo uses 1/3 of the water consumption to grow than oak

sustainable buildings

The use of bamboo products can help achieve a higher certification level for LEED and BREEAM. It can also help achieve more points towards the building becoming WELL-aligned.

one of the fastest growing plants

It only takes a year to grow back after it's been harvested. Some species grow more than 3 feet (1 metre) each day.

bamboo uses no pesticides or chemical fertilisers

clean air

Bamboo releases 30% more oxygen than hardwoods and it absorbs 5 times more carbon dioxide than standard trees.

low energy powder coating

Our specially designed powder coatings are cured at lower oven temperatures, which reduces energy usage and waste generation, lowering our overall carbon footprint.

anti-bacterial

Bamboo has the ability to withstand and kill bacteria. It is also very easy to clean.
