Find Focus Anywhere

FROVI

Mello

In today's ever-evolving workplace, the demand for environments that balance connection with concentration has never been greater. As open plan spaces thrive, so too does the need for moments of privacy, focus, and calm. We are seeking spaces that support our wellbeing, enable deeper thinking.

Know which acoustic pod is available from afar instantly, with just a glance at the occupancy indicator at the top of the pods. This is especially useful if you are looking for a pod at the last minute, or just need it for a quick call or discussion

Turn on hybrid

As hybrid working becomes the norm, the need for functional, quiet spaces within open-plan offices has never been greater. A well-designed, mobile workspace not only supports focus but actively enhances employee performance and output.

1. Acoustic Excellence MELLO pods are engineered to deliver Class B sound insulation (ISO 23351-1), creating focused spaces within open-plan environments—ideal for confidential calls, deep work, or quiet conversations.

2. Designed for Healthier Work Every MELLO pod is equipped with HEPA-filtered air circulation, providing clean, purified air that enhances wellbeing and supports user comfort over long sessions.

3. Fast, Flexible Setup Built with modern teams in mind, MELLO assembles quickly and is available with castors for easy relocation. Perfect for dynamic spaces and evolving floorplans.

4. Caring for your employees Post pandemic, employee's health and well-being will no longer be an after-thought. It is to be included and planned for right from the beginning. MELLO acoustic pods are designed ergonomically consumer friendly, and environmentally friendly, providing a safe and stress-free space for all your employees.

5. Sustainably Made In keeping with Frovi's commitment to responsible design, MELLO pods are made from up to 98% recyclable materials. Acoustic panels are crafted from 100% recycled PET, and galvanised steel forms the structural backbone.

6. Power Where You Need It CE-certified Type A/C USB and AC outlets keep your devices powered and your workspace cable-free. Built-in charging keeps productivity flowing.

Distraction-Free Zone

Focus. Connect. Reset. MELLO provides an acoustically secure, psychologically safe space where users can disconnect from the buzz of the office and reconnect with their best thinking. The minimalist glass door ensures transparency while reducing sound, offering a calm oasis without creating barriers.

Green Guard Gold

Mello acoustic pods are GREENGUARD Gold certified, meeting rigorous standards for low emissions of VOCs, formaldehyde, and other harmful chemicals. This certification reflects our commitment to creating healthier work environments. With Mello, you can provide your teams with a safe, quiet, and comfortable space - designed not only for focus and collaboration, but also for well-being.

Aesthetic & Materiality

Form Meets Function—Flawlessly. MELLO integrates seamlessly into contemporary interiors with a refined material palette and range of colour options. Choose finishes that complement your project—from soft neutrals to bold colour accents—all with Frovi's trademark craftsmanship and aesthetic coherence.

MELLO now features reeded glass detailing on its front and near elevation—providing a sophisticated layer of visual texture while enhancing user privacy.

The vertical ribbed pattern offers discreet visual shielding without compromising natural light, delivering a refined, design-led finish that complements contemporary interiors. It maintains openness while supporting focused, undisturbed work—a key need in hybrid workplaces.

The image displays three vertical panels of architectural-grade concrete and rust-effect exterior cladding options for the MELLO pod system. The panels are arranged side-by-side, each featuring a different finish: a light gray concrete texture on the left, a dark charcoal gray concrete texture in the middle, and a rust-effect finish in shades of orange and brown on the right. Each panel is held in place by a black clip at the top and a green clip on the left side. The panels are set against a plain white background, and the floor is a smooth, light gray surface.

New architectural-grade concrete and rust-effect exterior cladding options bring a raw, tactile materiality to the MELLO pod system.

These premium finishes elevate the pod from a utility product to a sculptural workplace feature, ideal for projects where design impact matters. Whether specifying for industrial-chic offices or biophilic environments, these cladding options create a statement piece that blends performance with design authenticity.
